

THE GAME-CHANGER: PRE-INSTALLED DOOR HARDWARE

The installation of door hardware can be a challenge. Too often, general contractors find themselves managing multiple suppliers, chasing down replacements, and dealing with unwanted costly change orders.

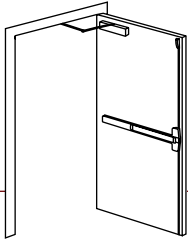

UNIFIED CAN HELP YOU CHANGE THE GAME WITH OUR PRE-INSTALLED DOOR HARDWARE SOLUTIONS.

With pre-installed door hardware, the hinges, door closers, exit devices, locks and electrified hardware are installed and tested on doors before they arrive at your job site. Our streamlined process ensures your hardware is expertly installed—on time, on budget and on plan. Pre-installation minimizes error, increases efficiency and often saves money in the long term.

▶ **Getting Ready to Bid a Project?**

The time to plan for pre-installed door hardware is at the start of a project. Unified will provide a transparent bid and show you how you will save time and money, while adding efficiency and ease to your project.

Union pre-installation support is available.

ADVANTAGES OF PRE-INSTALLED DOOR HARDWARE

- **Time and cost savings**, with a reduced installation schedule and fewer unexpected expenses
- **Skilled labor** with a proven record of installing door hardware expertly and efficiently
- **Shop-tested and certified products**, so you know the hardware works before it arrives
- **Reduced jobsite waste**
- **Elimination of missing parts**
- **Reduced jobsite footprint**, decreasing the number of people required to be onsite at the same time
- **Just-in time delivery**, which reduces the potential for onsite damage

WHAT CAN BE PRE-INSTALLED:

DOOR HARDWARE

- Hinges
- Locksets
- Exit devices
- Closers
- Flushbolts
- Kickplates
- Overhead stops

ELECTRIFIED HARDWARE

- Electric locksets
- Card access locks
- Electric strikes
- Programmable locks
- Special applications
- Accessories

HOW PRE-INSTALLATION SERVICE WORKS

- Hardware is pre-installed on doors.
- Electrified or electronic access control hardware is tested.
- Doors are palletized, according to site installation schedule.
- Loose hardware and installation accessories are packaged with each door set.
- Pallets are stretch-wrapped, and appropriate protection (spaces and corner guards) is applied to safeguard the doors for shipment.
- Pre-installed doors are shipped to jobsite, ready for installation.
- Unified installation specialists provide onsite service.

Unified Door & Hardware Group is a network of successful hardware distributors across the country. We offer products from nearly every major hardware manufacturer and can support you from design and build through install and service. Visit udhgroup.com to learn more.
