UNIFIED DOOR & HARDWARE GROUP

TRANSITION TO TOUCHLESS

The full impact of COVID-19 remains uncertain. What is certain, though, is how to reduce its spread. In commercial buildings, that starts when you open the door.

Touchless door hardware solutions lessen contact transmission and minimize opportunities for exposure. Whether it's public restrooms, main entrances or individual offices, hands-free environments have gone from a special feature to a necessity today.

The touchless solution sets listed are just a few of the options available. Unified will work with you to determine the right touchless solutions for your building, budget and long-term goals.
Contact us at Unified.

DETEX

Ideal for ADA applications and locations where hygiene is important, Detex's germ-free door hardware keeps germs at bay. From Advantex to automatic operators, Detex has your germ-free door hardware covered and Detex's touchless door activation makes opening doors as easy as a wave.
